Profile

Polyglot Software Engineer with hands-on experience in building scalable web and mobile applications across diverse tech stacks. Adaptable and fast-learning, with a focus on flexibility, problem-solving, and delivering results in dynamic environments. Skilled in designing, developing, and deploying end-to-end solutions using modern frameworks and cloud infrastructure. Driven to build well-architected, high-performance systems that scale and deliver measurable impact.

Experience

Full-Stack Engineer (Part-time), Two.Zero - Spain Feb 2026 - Ongoing

- Contributed to the development and maintenance of multiple mobile and web applications
- Tech Stack being used: FlutterFlow with Supabase/Firebase

PolyGlot Software Engineer, Cowlar Design Studio – Islamabad July 2025 - March 2026

- Designed and developed a multi-tenant manufacturing automation platform for a globally recognized vehicle manufacturer to handle asset management, production tracking, alerting, and role-based reporting.
- Implemented frontend (Vue.js) and backend microservices (NestJS, Go, Prisma, PostgreSQL, MQTT, Chirpstack) to enable real-time communication between IoT devices and the application.
- Led end-to-end architecture, development, and deployment as a sole developer, while directly collaborating with the client.
- Contributed significantly to a factory automation system powering fiber-cable production lines, delivering live operational dashboards and end-to-end process visibility.
- Operated in a client-facing role, gathering requirements and independently delivering features from development through deployment.

FullStack Development Intern, SOFTOO – Islamabad July 2024 - Aug 2024

- Led a 3-member team in building an internal accounts management platform using MERN stack.
- Set up CI/CD pipelines with GitHub Actions, cutting deployment time by over 60 percent.

MERN Development Fellow, Bytewise – Remote June 2024 - Sep 2024

- Completed a 100-day intensive MERN Stack fellowship.
- Technologies Covered: JavaScript, CSS, Tailwind, Material UI, SASS, GraphQL, JWT, React.js, Redux, RESTful APIs, Node.js, Express.js, Git, MongoDB.
- Developed and deployed a chatbot web application using MERN stack.

Skills

- **Technical:** Frontend[React.Js, React Native, Vue.js, Astro, Tailwind, SASS, Figma, FlutterFlow, WebFlow, PrimeVue], Backend[Node.Js, Nest.Js, Fastify, Firebase, Express.Js, GO, RESTful APIs], Databases[MongoDB, MySQL, Postgres], ORM's[Mongoose, Sequelize, Prisma], Docker, Linux, Cloud Platforms [AWS, Huawei Cloud], CI/CD and Version Control [Git/Github/GitLab, Github Actions], Expo Go, Chirpstack, MQTT, Web Sockets
- **Non-Technical:** Team building, Communication, Problem solving

Education

FAST (NUCES), BS in Computer Science 2021 – 2025

- **Coursework:** Design and Analysis of Algorithms, Software Development and Architecture, Software Engineering, Software Project Management, Cloud Computing, Devops, Web Programming, UX Engineering

Achievements

Batch Gold Medalist, FAST (NUCES)

Fall '24

3 x Dean's List of Honor, FAST (NUCES)

Fall '23, Fall '24, Spring '25

Projects

FitFlex | AI-powered fitness trainer

- Created a comprehensive AI-powered mobile fitness portal
- Implemented real time workout analysis and audio feedback using computer vision
- Integrated Mediapipe for landmark detection
- Used AWS EC2 instances and Load Balancer to run server scripts periodically
- Technologies: React Native, Node, Express, Python, MongoDB, Expo Go, AWS

Diet GPT | Nutrition Chatbot

- Developed an improvised version of ChatGPT for diet specific queries
- Technologies: React js, Node, Express, MongoDB, Hugging Face

HackScan | Network Scanning Tool

- Created a network reconnaissance tool through packet manipulation
- Created a user friendly web interface for the server
- Technologies: React js, Node, Express, Python, Scapy

Certifications

- AWS Academy Cloud Foundations
- AWS Academy Web Application Builder
- HCIA- Huawei Cloud Services v3.0
- HCIA- Huawei Cloud Computing v3.0
